

Agenda for June 7, 2018 meeting of the Warrensburg Energy and Sustainability Task Force

1. Approval of the minutes of the May 3, 2018, meeting
2. Personal information of committee members. As we work together it would be helpful for each of us to briefly share some of the interests, skills, and knowledge that each of us brings to this task force.
3. Report from Bob, Casey, and Steve concerning the community solar idea we briefly discussed at our last meeting. If we want to pursue this, we will talk about the next steps to move this forward.
4. Discussion (and possible adoption) of the Statement of Purpose that was distributed at the last meeting. It is as follows. 'Purpose: The Warrensburg Energy and Sustainability Task Force shall suggest and encourage energy efficiency, conservation, and renewable energy solutions to the city of Warrensburg. In addition, the Task Force shall educate community members through civic engagement and collaboration in an effort to create a sustainable and prosperous community for current and future generations.'
5. Update from Beth concerning her intern's search for 'sustainable city' information.
6. Possible first suggestions to the city.
